SPECIFICATION CV2419 ISSUE 2 DATED 1st DECEMBER 1958

AMENDMENT NO.1

Page 1. Under heading RATING Delete "Max" in "Max. Fourth Anode Voltage"  
Delete 4,5kv and substitute "Note B".

At bottom of page, insert NOTE B as follows:-

- B. The voltage applied to a4 must be less than the voltage applied to a5 but a secondary emission effect may be observed if this difference in voltage exceeds 1.5kv.

Pages 2 and 3 Under Column headed "Test Conditions"

Amend Va4 voltage in each case to read 5kv.  
(this applies to test clauses b,c,d,e,f,h,j,k,l,m and n)

Page 4. Outline Drawing near top left hand corner:-

Interchange P.D.A. side contact references to read a5  
nearest to screenface and a4 nearest to tube base.
